

SLAT PROTECT

Technical features

Composition :

260 g / m² opaque polyethylene canvas
PVC grid sewn on the perimeter

Average blanket weight :

280 g / m²

Fixings :

Eyelets and Sandowclips

Manufacturing :

The cover is made according to the internal dimensions of the pool

Stairs :

The stairs are covered by the blanket

Important :

Given to the risk of damage of the PVC slats due to overheating, it is not recommended to use the WaluSeasons SLAT PROTECT colored screen winter in summer. Remove the cover as soon as the first rays of sun appear or opt for the 4 season color.

Attention: not suitable for PVC slats covers.

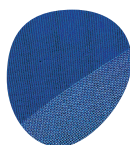

About the product

Easily adaptable to above ground or submerged slatted covers, SLAT PROTECT turns the slatted cover into a winter cover.

White-grey-aluminized

+ points of the product

Ease

Adaptable to above ground or submerged slatted cover. Transforms the shutter apron into a winter cover. No anchoring or drilling on the pool decks.

The making

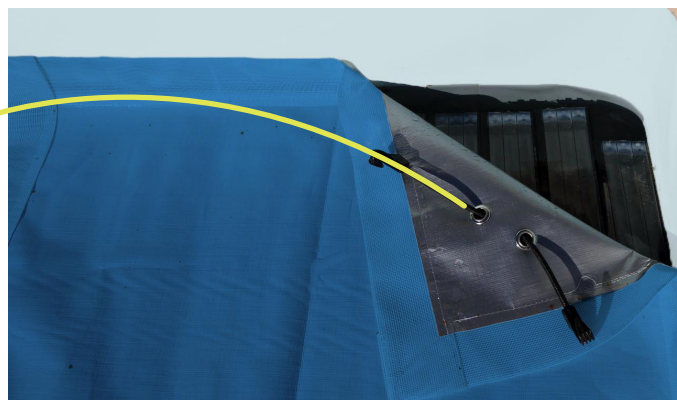

Quick and simplified installation thanks to its lightness and to the clips that attach directly to the slatted cover.

The solution

Effectively protects the slatted cover from UV rays, impurities, dirt and pollution. The peripheral net retains the leaves and filters rainwater.
